

AMATU NORITO

Everyone should practice to see the pure inner meaning of each sound. This is an ancient, symbolic prayer left to us by our ancestors, but the order of the sounds will help us to return to the place of natural and complete human beings. That is the reason that our ancestors left it to us. If we try to see their meaning by translating it word for word it is impossible. But, just roughly I will give you some sense of the inner meaning to the order of sounds in this prayer.

I have knowledge of the fifty sounds of the Kototama Principle, and I am seriously trying to put all of the phenomena in a priori and a posteriori into exact order by using the Kototama mirror. I know that if I can do this work exactly that it will be impossible for me to commit any kind of crimes, either spiritually or physically...everything will be purified. It is for my purification today that this sound principle was created by Izanagi when he was able to completely grasp the order of his own manifestation from U unto all of the millions of separate manifestations which are permanently staying in the bottom of our beings as the capacity of human life. Now I am seriously searching and asking that I be able to completely take back this original capacity so that I can manifest out everything as it is. May the perfect order of the universe manifest out through my life as my own complete capacity...as I am.
